CAREER OBJECTIVE

I want to learn a lot about reasoning, cyber-security, and artificial intelligence so that I can become a great programmer and computer scientist. My goal is to make a real difference in the field of AI tech while also always getting better as a person and a worker.

RESEARCH INTERESTS

Natural Language Processing and Large Language Models, Computer Vision (remote sensing), Generative AI, Retrieval-Augmented Generation, Gene-Disease Association, Graph Neural Networks, Knowledge Graph, Cyber Security.

EDUCATION

Ahsanullah University of Science and Technology, B.Sc. in Computer Science and Engineering December 2023
• CGPA: 2.849/4.0
BCIC college, Higher Secondary Certificate July 2018
• GPA: 4.25/5.0
Monipur High School, Secondary School Certificate May 2016
• CGPA: 5.0/5.0

EXPERIENCE

Junior Software Engineer (ML team), [Silicon Orchard LTD.](#) March 2024 – Present
• Contributed to a corporate project by implementing a **RAG** system and overseeing API deployment utilising **FastAPI**. Implemented the system on the company's proprietary server.
• Currently engaged in a research project utilising the **YOLO** object detection model.
• Engaged in an ongoing initiative that focuses on improving current operations. In this work, I used the **fuzzy c-means** clustering method, evaluated the clustering, and used the existing **autoencoder** model for text processing.
